A Holmes & Doyle Bibliography
Being A Supplement to The Universal Sherlock Holmes
New Items Added

Below are items recently added to *A Holmes & Doyle Bibliography* (also known as "The Supplement"). Randall Stock—a fellow Sherlockian from California—suggested that this type of listing would be a useful addendum to the *Supplement* as another way to track new additions to the bibliography. I am thankful for his suggestion. New items will be presented in monthly installments. Sometime near the end of each month these entries will be “dumped” into the larger bibliography. As always, I am open to comments and suggestions that will make this research tool more useful.

Includes bibliographical references and indexes. Edited by Eugene Winograd, Robyn Fivush, William Hirst. // (from the preface) "In November 1996, a conference was held at Emory University to celebrate Ulric (Dick) Neisser's career in psychology. This book reflects the breadth and richness of Neisser's theoretical and empirical contributions to the understanding of visual search, attention, visual imagery, memory, and the self. In *Cognition and Reality* (1976), Neisser argued for and ecologically based approach to cognition, emphasizing the world outside the laboratory. He criticized mainstream cognitive psychology for lacking ecological validity and, generally, for its excessively narrow preoccupation with internal processes. Since *Cognition and Reality*, Neisser has consistently applied an ecological approach to cognition. Some examples from memory research are his analysis of John Dean's testimony involving detailed analysis of the Watergate tapes, his work on the memory of Baker Street Irregulars for Sherlock Holmes stories, and his many publications on the problem of flashbulb memories. This book is organized into 3 sections: perception and its development, cognition and its development, and philosophy and education. The intense and careful effort his colleagues and former students clearly put into their chapters in this book speaks forcefully of Neisser's influence."

NOTE // ABSTRACT --- Scuttlebutt Sept 2005. // "Bartitsu was invented by E. W. Barton-Wright, and is believed by many Sherlockian scholars to be the baritsu that Sherlock Holmes mentions in 'The Empty House'."

"One of the finest collections of Sherlock Holmes material ever offered for sale is expected to fetch \$150,000 at auction in London this month. The July 24 auction will feature first editions, papers and memorabilia relating to one of the world's most famous fictional detectives and his creator, Sir Arthur Conan Doyle. The collection, amassed by Stanley Mackenzie, a former custodian of London's Sherlock Holmes Society who died earlier this year, includes the pipe used by Peter Cushing in his film portrayal of the Victorian detective and a gold cigarette case inscribed, by Conan Doyle, 'Sherlock Holmes.'"

"Sherlock Holmes enthusiasts in Italy have unveiled a bronze bust of the Great Detective at a Florence railway station to mark Holmes's -and Sir Arthur Conan Doyle's -little-known Italian connection. Gianluca Salvatori, head of the Italian Sherlock Holmes society Uno Studio in Holmes (A Study in Holmes), said it was not widely known that Holmes had visited Florence after his struggle to the death with Professor Moriarty at the Reichenbach Falls. In 'The Adventure of the Empty House', the first story in *The Return of Sherlock Holmes*, the detective tells the astonished Dr Watson (who like everyone else thought that Holmes had perished) that after surviving the encounter with Moriarty thanks to a hidden ledge, 'I took to my heels, did ten miles over the mountains in the darkness, and a week later found myself in Florence, with the certainty that no one in the world knew what had become of me'....".

98. Robinson, Karen. "Talking Books." *The Sunday Times (London)*, August 10, 1997. Books 1. Review of *The Adventures of Sherlock Holmes: Volume 1*, by Sir Arthur Conan Doyle, read by Douglas Wilmer. "The observational powers of supersleuth Sherlock Holmes have been parodied so often that the real thing can read like a pastiche. Take Holmes's typical remarks on meeting the victim of the Red-Headed League: 'beyond the obvious facts that he's done manual labour, that he is a freemason, that he takes snuff and that he has been in China...' And as he explains his deductions to Dr Watson, the obligingly impressed sidekick registers only that he feels, again typically, 'oppressed with a sense of my own stupidity' in his dealings with his brainy friend. But Holmes without Watson would be a megacephalic show-off with a cocaine habit, and Watson a boring medico. Together, as Watson provides ballast to Holmes's daring and brilliance, they solve some of the most dastardly crimes of Victorian England. This collection includes a scam in which 'Fleet Street was choked with red-headed folk', and an encounter with a tantalising female who arouses unusual feelings in the misogynistic Holmes breast. Douglas Wilmer conjures up a gaslit London rich in mystery and incident (Penguin Pounds 7.99, 3 hours abridged)."
99. Rodley, Aidan. "McDonald's Ideal Holmes Exhibition?" *Daily Mail (London)*, August 5, 2000. 11. "The McDonald's fast food chain say they will include Sherlock Holmes memorabilia as part of their design if they are allowed to develop a restaurant on the site where Sherlock Holmes' creator Sir Arthur Conan Doyle once lived. The burger giant has put forward amended designs for a 75-seater restaurant at Liberton Bank House, Edinburgh, where the author lived as a boy in the 1860s. The plans includes displays of Holmes exhibits in the proposed restaurant. The company sparked an outcry last year when it announced plans to destroy the house. The Edinburgh City Council put a preservation order on the building and Historic Scotland opted to re-list it. The latest plan promises to incorporate the building into the design of the restaurant. McDonald's has claimed the plans are a reasonable compromise, but Dr Allen Simpson, co-ordinator of the campaign to save the building, said it was unacceptable. Dr Simpson said he expected the people of Edinburgh to be outraged when the McDonald's plans were made public. He said: 'The question the council will have to face is whether the building of McDonald's would degrade the setting of the house. What we have to bear in mind is that this city has so few associations left with Conan Doyle.' The house where Conan Doyle was born in 1859 was demolished to make way for a roundabout. A spokesman for McDonald's said: 'Our plans seem to us to be a very reasonable compromise. 'The Cameron Toll site is, aside from the Liberton Bank House issue, a perfect location for us.'"
100. Ronson, Jon. "The Human Zoo: Magical History Tour." *The Guardian (London)*, September 2, 1995. T62. "...There are, as it stands, three competing Beatles Walks of London. This would be confusing in itself, but it is compounded by the four Sherlock Holmes tours that are taking place concurrently - on the same pavement. 221b Baker Street is perilously close to the house that Paul McCartney shared with Jane Asher between 1963 and 1966, and walkers have been known to switch allegiance mid-tour. Today, in fact, two old ladies from America do just that...."

"To many fans of Sherlock Holmes, he was always the actor. Jeremy Brett, who died this month in London at the age of 59, first incarnated the great detective in 1984 in 'A Scandal in Bohemia,' the first of 41 BBC productions of the Arthur Conan Doyle stories in which he starred....".

103. ———. "Gilbert & Sullivan, According to Doyle." *The Washington Post*, July 30, 1997. C01. Review. "'Sherlock Holmes and the Case of the Purloined 'Patience,' which opened Saturday at Interact Theatre, is a charmer. In the time-honored tradition of Sherlockian pastiche (think 'The Seven-Per-Cent Solution'), author Nick Olcott has taken an actual incident in Victorian history -- the 'pirated' American productions of Gilbert & Sullivan's 'Patience' in 1881 -- and brought in the fictional Holmes to solve the case. It's a slightly loony enterprise, the sort that might have called forth the classic Dr. Watson exclamation, 'What ineffable twaddle!' Yes. Exactly. Thank heaven....".

"An expert on Sherlock Holmes was found garrotted in bed surrounded by cuddly toys and a bottle of gin at his London home, an inquest heard today. Richard Lancelyn Green, 50, from Kensington, had grown paranoid that people were plotting against him. He coedited a book about Holmes creator Sir Arthur Conan Doyle. Mr Green died after a shoelace was tightened around his neck using a wooden spoon, but it was unclear if he killed himself, Westminster Coroner's Court was told. An open verdict was recorded."

Review of *Detective Fiction and the Rise of Forensic Science* by Ronald R. Thomas. Illustrated. 341 pages. Cambridge University Press. \$59.95. "...The detective story really is partly a tale about race and nationality, imperialism and bourgeois life: Sherlock Holmes's villains are from the far corners of the British Empire (including the barely civilized United States); Poe's villain in 'Rue Morgue' is not even human. So preoccupations with these political themes also run through this dense, smart book as well. But Ronald R. Thomas, professor of English at Trinity College in Hartford, also steps back from the crime scene, following tracks left by Poe and Sir Arthur Conan Doyle, Dashiell Hammett and Raymond Chandler, Joseph Conrad and Mark Twain, scrutinizing how the development of forensic science was intertwined with the evolution of the detective story....".
106. Rowan, David. "Strange Case of the Building Society which was found at the Wrong Address." *The Guardian (London)*, November 10, 1994. 26. "It is the Case of the Missing Door Number, or perhaps the Hound of Westminster Council. For the quest to occupy Sherlock Holmes's famous lodgings has brought financiers, councillors, and now Sir Arthur Conan Doyle's daughter into a conflict more bitter even than Mrs Ronder's prussic acid. Only the intervention of the nation's law makers, it seems, can decide finally who owns 221b Baker Street. The problem is that there never was, or is, a Number 221b. An Abbey National edifice has long been numbered 215-229, and the Sherlock Holmes Museum stands, as the Post Office sees it, at 239. But both have been claiming the rights to the legendary address which Watson found 'cheerfully furnished, so desirable in every way'. And now Westminster council has come down on the building society's side....".

"Recently, I read again the adventures of Sherlock Holmes, famous detective resident of Baker Street and main character in one trail-blazing whodunit form. Arthur Conan Doyle's adventures have a comforting formula. A case is brought to Holmes - usually in the company of Watson, his doctor friend (Elementary, my dear Watson, which he never really says in any of the stories) and narrator of the series....".

"Certain serial characters like James Bond live on in sequels that more modern authors have been authorized by the estate to take on. Even Victor Hugo's Cosette and Margaret Mitchell's Scarlet O'Hara have been resurrected in sequels. But no other character fascinates mystery writers more than Sherlock Holmes....Caleb Carr's *The Italian Secretary* (2005, 266 pages) hews more closely to the Sherlock Holmes "canon." This canon consists of the Doyle's Sherlock Holmes character in the complete stories which define his mannerisms, history, approach, and partnership with Watson whom he first met in *A Study in Scarlet*. Thus, continuing the character beyond the life of the original author needs a familiarity, if not intimate knowledge, of who Sherlock Holmes is....".

"Box-office hit movies invite new installments to continue the narrative from where it left off. So popular are sequels that producers always look out for a 'franchise' - a succession of sequels featuring the same characters moving into different situations....Strangest of all are sequels to old classics fashioned by new authors....Then there is Michael Dibdin, a mystery writer who has created his own unforgettable detective in Aurelio Zen, an Italian sleuth struggling with the police bureaucracy and the mafia. Early in his mystery-writing career, Dibdin wrote a story featuring Sherlock Holmes. Dibdin prefaces his mystery, *The Last Case of Sherlock Holmes*, with a quote from Arthur Conan Doyle which purports to allow future writers to do what they wish with his immortal character, Holmes. 'Marry him, kill him, do what you want with him,' Conan Doyle is claimed to have said. Dibdin takes Conan Doyle at his word and proceeds to spin a tale of the master of deductive reasoning which is sure to upset some Sherlock Holmes fans, including this one....".

"The popularity of the sequel is easy to understand. A box-office hit already contains the ingredients that have worked with the paying audience. There is a built-in following that understands the major characters. A sense of clubbiness prevails among fans who share trivial knowledge of the plot, its history, and the various characters involved. Even when new villains are matched up against the familiar hero, they exude the same evil and familiar mystique....Then there is Michael Dibdin, a mystery writer who has created an unforgettable detective in Aurelio Zen, an Italian detective struggling with the bureaucracy and the mafia. Early in his writing career, Dibdin had written a sequel of Sherlock Holmes....".

Mr [Richard Lancelyn Green] had collected 20,000 items, including a recreation of 221b Baker Street....His will, published today, leaves them to the library service in Portsmouth, where Conan Doyle lived and worked between 1882-1890 and where he helped to found Portsmouth Football Club, becoming its first goalkeeper. The collection will be catalogued before going on display in 2006."

"The floor-length curtains cloaked the crowd in darkness, thick and ominous, inside the Surf Room at the Dolphin Beach Resort. The question before the assembled participants of the first Sunshine State Sherlockian Scion Symposium was provocative. Was Sherlock Holmes related to Spock?...It was all part of a celebration marking the 25th anniversary of the Pleasant Places of Florida, a local group of Sherlock Holmes enthusiasts based, fittingly, in Holmes Beach. (At least one of the Holmes mysteries had a local connection. Part of The Five Orange Pips takes place in Florida.)..."

"Although not widely known among British skiers, the region of Meiringen-Hasliberg is beginning to gather a loyal following....A rather more arcane attraction of Meiringen is that it was the location Sir Arthur Conan Doyle chose for the death of his hero Sherlock Holmes. The old Anglican church here has now been turned into a Sherlock Holmes museum and an excursion can be made to the Reichenbach Falls, to see exactly where the famous sleuth died at the hands of his archenemy Moriarty....".
